

## WISH YOU A HAPPY NEW ACADEMIC YEAR 2016-17

Dear Scholars,

Welcome to the new academic year 2016-17. During this academic year we invite you to energize yourselves with new ideas and ideologies using your potential to make the entire year a rewarding one for all. Be truthful and respect the truth of others. Make others happy with what you have and forgive their shortcomings and be with them forever to cherish the world as one. Do something good that is beyond the comfort zone. Be the voice of needy and deserved and those who do not have a voice to raise their concern. Choose the healthy way of lifestyle, food, activities and the people. Remember that you have been given the wonderful days to use in a systematic way which will create the future.

We have an opportunity to explore how to develop and implement the concepts of social justice, ethics and conflict resolution in order to ensure the fairness and respect in various arenas of daily routine.

In Scholars, we encourage you to take a fresh look at everything that makes up challenging and rewarding efforts and would take you to the heights. We hold high esteem on the human relationships we have with our students. The ideas and values that underpin the development of the human person in his or her experience of life fascinate us, as they do you. And we are in constant effort to provide you with opportunities, both academic and co-scholastic, to make sure that you are groomed into the best humans of tomorrow. As mentors, it is challenging, exciting at the same time an honour for us. This year we are exposing your skill and creativity in many things, READS AND REWARDS PROGRAMME being one of the many. ACER TESTS will be given more importance and we would like you all to take part in it. We are planning to provide extra coaching for the same.

We hope that you can contribute to the whole world so that all will develop the qualities that the world need to be true agents of change. Let us be global citizens who are concerned of our environment. Let us contribute on our own even though in small measures. Let us be thoughtful when we are wasting water, electricity and paper. Let us rethink about our actions and realize the mistakes that we have been committing, though unknowingly. Let us be a model. It is by willing to transform ourselves that we transform the world.

This is a commitment we want to do with you. We hope you will accept this initiative and the invitation that you will have countless rewards and practical lessons from it.

Once again, we welcome you with enthusiasm to the new and rewarding academic year.

Prof.M.Abubaker
