NEWLETTER

10th
EDITION

THE MESSAGE

Habib Mundol, Chairman

It is with immense pleasure that the Scholars Family present the 10th edition of “*Reflections*” - the Scholars Newsletter. Reflections will give everyone a glimpse inside the day to day operations of the school and the various events, programmes and activities that we have conducted since the beginning of the academic year.

Despite the heavy academic load placed on the students and teachers during this shortened working period which included a 2 month long summer break, the School Management has endeavoured to produce a varied and eclectic co-curricular program for our students. For example, Scholars has successfully organized and conducted training sessions using external experts for robotics projects. School Management and the IT department then organized the “Stogo Fest” which provided the students who undertook the Robotics training programme a proper platform to present their robotic creations. We also commemorated and celebrated World Environment Day with many initiatives across our campus.

I would like to personally express my thanks to the Principal, School Leadership team, Teachers and non teaching staff for creating, organizing and executing all these events over the first 6 months of the academic year.

As we move full speed ahead into the 2nd half of the academic year, I am happy to say that the school management is not slowing down. There are many more events and activities tabled for the remainder of the academic year and I look forward to seeing them being featured in the 11th edition of Reflections.

My congratulations to the creative and editorial team behind Reflections and wish everyone the best for the rest of the academic year.

Hameed Ali Yahya K M, Principal

Unlike the past, formal education is undergoing a paradigm shift. Most of the teaching was meant to provide a lot of knowledge and this knowledge was tested in almost all the various types of assessments. That practice is no longer of any use.

All the employers as well as other agencies look for the skills and talents of the candidates, be it for a profession or an admission in an academic course.

Having realized this requirement, both CBSE and the UAE Ministry of Education have taken myriads of steps to elevate the standard of education promoting high expectations for staff as well as students. Based on this, Scholars Indian Private School presents many programmes to support the students and staff. Thanks to the hard works of our staff, the response from the students is overwhelming.

Let me take this opportunity to congratulate the staff, students and parents for their support and cooperation in this effort. I also extend my gratitude to the management for their motivation and encouragement.

I wish everyone all the best.
